

Creating a QR Code

1. Go to one of the following websites to create a QR code.
 - <http://qrcode.kaywa.com> - Create a text QR code or a QR code for a website.
 - <http://qrvoice.net> - Create a voice QR code that includes maximum of 100 characters.
2. Enter the text, website address, or other information in the space provided on either QR code website.
3. Select the option to generate the QR code.
4. After the QR code has been generated, right click on the QR code.
5. Select "Save As" or "Save Image As".
6. Give the image a name and save it in your documents.

After the QR code image is created and saved on your computer, you can insert it into a word document, SMART Notebook file, or add it to your teacher webpage.
